WORK EXPERIENCE

SOFTWARE ENGINEER

- Paintzen | Aug 2019 - Present

  - Built new project management tool for our national customers using Next, Semantic UI, Node, and MongoDB
  - Integrated DocuSign and EvidentID APIs with background check tool with React, Node, Express and MongoDB
  - Developed new reusable AWS Lambda service for our Google Maps integration for use across multiple apps
  - Automated bidirectional data flows between multiple 3rd party APIs using AWS Serverless architecture

ASSOCIATE INSTRUCTOR OF SOFTWARE ENGINEERING

- Galvanize, Inc. | 2019

  - Conducted technical interviews on JavaScript fundamentals for prospective students
  - Provided technical support to 50+ students while also instructing them on debugging best practices
  - Hosted community events and after hours talks for students within a remote learning environment
  - Provided peer code reviewal for students and colleagues throughout the organization

EDUCATION

Hack Reactor @ Galvanize
2019
Advanced Software Engineering Immersive Program

PERSONAL

Passionate about music and music production. As a musician, I've toured across the United States extensively. While no longer touring, I continue to record and collaborate with others musically during my free time. The average Pitchfork rating of all the bands I've played in is 7.4.
